GERRY CARTER
New York, NY - dev@sportalytics.cloud – 914.979.1173 - https://github.com/mrcartier

PROFESSIONAL SUMMARY

Experienced technology leader and IT manager with strong cybersecurity awareness and hands-on technical expertise in AV systems, cloud computing, and secure network infrastructure. Skilled at aligning enterprise technology with NIST, HIPAA, and GDPR compliance frameworks while delivering reliable, scalable, and secure solutions. Adept at bridging technical and executive teams to implement data protection, risk mitigation, and system optimization strategies.

TECHNICAL SKILLS

- **Security Frameworks:** NIST CSF, HIPAA, GDPR compliance, security policy implementation
- **Networking & Infrastructure:** VLAN configuration, port management, firewall assessment, Wi-Fi authentication, VPN setup
- **Access & Identity Management:** Role-based access, guest credential administration, IAM in cloud environments
- **Cloud & Virtualization:** AWS EC2, Lambda, S3, Route 53, CloudFront, WAF, JSON APIs, VMware Fusion, SaaS/PaaS/IaaS
- **Data Engineering & ETL:** pipeline development, data ingestion, web scraping, structured and unstructured data extraction, API integration, data transformation, PostgreSQL, Scrapy, BeautifulSoup, Flask
- **Automation & Development:** Python (pandas, plotly, scikit-learn, TensorFlow), Agile SDLC, DevOps practices
- **AV & Collaboration Systems:** Cisco, Crestron, Extron, AMX, Polycom, WebEx, Vectorworks
- **Governance & Operations:** Vendor management, contract negotiation, staff development, technology evaluation, ITIL, ITSM, PMBOK
- **Tools & Platforms:** Linux, Windows, macOS, nginx, Wireshark, Git, Jira, Trello, Remedy, ServiceNow, FastAPI, Bulma

---

PROFESSIONAL EXPERIENCE

Sportalytics – New York, NY
Data Engineer/ML Consultant *January 2025 – Present*
http://www.sportalytics.cloud

- Led offshore development team that built a Flask-based REST API with a PostgreSQL backend supporting time series forecasting models.
- Designed and implemented data pipelines to support ingestion, transformation, and storage of large scale datasets.

- Developed and deployed machine learning models (linear regression, SVR) for forecasting, improving accuracy and reducing anomalies by 20%.
- Automated structured data extraction using Scrapy and BeautifulSoup, enabling scalable web data collection workflows.
- Built interactive dashboards using Plotly, Pandas, and NumPy to improve data accessibility for nontechnical stakeholders.
- Collaborated directly with stakeholders to define technical solutions and guide model and application design decisions.
- Reduced database query times through data analysis and optimization of backend processes.
- Generated APIs using NGINX, Flask, and AWS EC2/API Gateway in production environments.

Imperial Development – Long Island City, NY
AV Engineer / IT Manager *January 2016 – November 2024*
http://www.impdevt.com

- Strengthened cybersecurity posture by integrating NIST-aligned security principles into AV and IT system operations.
- Administered network ports, VLANs, and secure connectivity for videoconferencing and collaboration platforms.
- Managed user access and guest Wi-Fi credentials in accordance with internal security policies.
- Designed and executed secure configurations for Cisco, Crestron, and cloud-connected devices.
- Reactive web application development with python, pandas and plotly using py3 virtualenv.
- Established policies for data protection and encryption across locally hosted and cloud-based services.
- Collaborated with vendors to ensure compliance with privacy and security requirements in contracts and solutions.
- Directed AV infrastructure deployment projects across corporate, healthcare, and government environments with high security needs.
- Architected enterprise-wide processes for incident response, system hardening, and lifecycle management.
- Implemented cloud and API-based technologies (AWS EC2, Lambda, Flask) with secure authentication and encryption mechanisms.
- Engineered criteria for selection of model retraining datasets that produced a 20% reduction in inconsistencies and anomalies.
- Mentored team members on security-first troubleshooting and risk mitigation techniques.

Albert Einstein College of Medicine – Bronx, NY
Technical Support Specialist *January 2006 – September 2015*
https://einsteinmed.edu/

- Provided secure desktop, network, and AV support for faculty and staff in compliance with HIPAA privacy standards.
- Managed VMware virtual environments for system isolation and testing.
- Operated and maintained encrypted videoconferencing solutions using Polycom, Cisco, and WebEx.
- Supported AV control systems (Crestron, Extron, AMX) with network access restrictions and version control.
- Authored technical manuals including secure usage protocols and authentication methods.
- Recorded and stored academic content under institutional data governance guidelines.

EDUCATION

Master of Science – Electronics and Computer Technology *December 2012*
Indiana State University, Terre Haute, IN

Extron AV Associate (EAVA) *June 2014*
New York, NY
